

**LIGHT OF FUTURE SCHOOL**  
Kratie Province

**6-monthly Report 2016**  
July – December 31<sup>st</sup>, 2016

## **CAMBODIAN CARE'S LIGHT FUTURE SCHOOL**

**Kratie Province  
6-monthly Report 2016**

### ***Our statement of commitment***

*We strongly believe in holistic basic quality education that can surely transform the lives of underprivileged children to get out of their poverty situation.*

### **Vision:**

*Every child reaches their own fullness of life and becomes a member of the family of God*

### **Executive Summary:**

Kratie or Kraches is a province of Cambodia located in the northeast. It borders Stung Treng Province to the north, Mondulkiri to the east, Kompong Thom and Kompong Cham to the west, and Tbong Khmum Province and Vietnam to the South.

- Area 11,094 km<sup>2</sup>
- Population 318,523 (2008 census)

Koi Village is consisting of 80 families which it locates in Khsem commune, in Snoul district, Kraches province. It will take 5 hours to drive from Phnom Penh city to this village crossing Kandal and Kompong Cham province. Most of the people who have been living in this Koi village are planting rice during the period of month of June to August (planting process) and harvesting period is from December to January of the year. Beside, planting rice crop, they are hunting forestry for livelihood and some commute from their village to other villages work as laborer of pulling potatoes and other work.

In Koi village, people are facing malaria infection and spread during the rainy season while other diseases are common happening in this village such as: dengue fever, diarrhea, common cold, fever. There are not so much water resources except they are living by depending on rainwater. There are only few small streams which these people are able to get water from for their daily family consumption.

Many children have been suffering from basic formal quality education, because Koi village has no government school. Most of them are not able to attend school regularly because of long distance, and sometimes teacher(s) are not showing up in class on a regular basis. Most of these children are attending grade 1 to grade 3.

## **NUTRITION PROGRAM**

We provided all students with soymilks, vitamins, deworming and health education for 130 children. The mobile clinic is planned to open to serve the community people who cannot access to proper health providers and services. Many children and adults have been sick of preventative and curable diseases, sometimes they can be killed such the normal diseases if without good healthcare and services. The main purpose of this is to care for these underprivileged children and adults to grow healthy physically, emotionally and spiritually. They need nutritious supplementary food to help their bodies grow healthy. It is helping to be able to learn and grow mentally.

## **CHARACER DEVELOPMENT TRAINING PROGRAM**

This program is part of the national curriculums of Cambodian government school. To education and train teens to be able to operate in life with skills and keep their high moral as a part of citizenship. Once every week, we're training those teens from different perspectives of religious views, especially looking at biblical values to learn and to live in everyday life-living.

## **INCOME GENERATION SOLUTIONS**

Cambodian Care will eventually plan to have self-sustaining for all its school programs. Here some future and current implementation of income generation solutions:

Our current implementation in term of income generation plans

1. Cambodian Care's School Tuolpongror Program has been reducing some school uniforms by increasing the ownership of parents to take care of these expenses
2. Cambodian Care's School Tuolpongror Program will continue reducing school materials each year by increasing the ownership of parents of those students. Those school materials such as: text books, writing books, pens, pencils and others related to school.
3. Cambodian Care's School Village 2 (Train Track) and Kratie School Program has been informing all parents about the possibility of contributing fees to help running this school

Our future implementation in term of income generation plans

1. Cambodian Care will setup sewing/tailoring projects with at least two specific purposes:
  1. Providing skills and job employment for underprivileged parents or single mom
  2. Generate income to support all Cambodian Care's School Programs.
2. Eco farming implementation with all our possible school premises of Cambodian Care

### Impacted Story

Korn Near is my name. I am 6 years old. I study in grade 1. I have one brother and one sister. I never attended school before. I can't read and write. I am so happy that this Light of Future School is in my village and I have the opportunity to learn. Now, I can read and write. My parents are so happy for this school to be in our village.

I want to be a medical doctor when I grow up. I like to eat fish and pork for my meals.

Thank you for supporting this school so that we can learn.

I am Run Ravy, I am 9 years old. I study in grade 1. My parents are farmers. I have one brother and one sister. I never attended school before. But I am so happy now that I can learn because this school is in my village. Now, I can read and write. I know some math. I can also learn English Alphabets. My parents are so happy for this school.

I want to be a school teacher when I grow up. I like to eat fish, and play with my friends at school.

Thank you for this school.
